

# SAFETY DATA SHEET

According to HSNO Hazardous Substances (Safety Data Sheets) Notice 2017

Trade Name: Feratox
Product No: RC101, RC102, RC103
Document Number: SDS01/01FTX
Version Number: 2021.10.13

## Section 1. Identification of the material and the supplier

Product: Feratox 475g/kg

Feratox for control of possums and Dama Wallaby

Product Use: Vertebrate Toxic Agent for use in bait stations or bait

devices as per label instructions

Restriction of Use: Refer to Section 15

New Zealand Supplier: **Connovation Limited**Address: 36 B Sir William Drive

East Tamaki, Auckland

PO Box 58613

Botany, Auckland, 2163

Telephone: +64 9 273 4333 Fax: +64 9 374 4334

Emergency No: 0800 764 766 (National Poison Centre)

Date of SDS Preparation: 13 October 2021 v2

# Section 2. Hazards Identification

This substance is hazardous according to the EPA Hazardous Substances (Classification) Notice 2020

**EPA Approval No: HSR001673** 

**Pictograms** 

Toxic Chronic Corrosive Ecotoxic

Signal Word: **DANGER** 

GHS Classification and Category	Hazard Code	Hazard Statement
Acute oral toxicity Cat. 2	H300	Fatal if swallowed.
Acute dermal toxicity Cat. 2	H310	Fatal in contact with skin.
Skin sensitisation Cat. 1	H317	May cause an allergic skin reaction.
Reproductive toxicity Cat. 2	H361	Suspected of damaging fertility or the unborn child.

Product Name: Feratox

Prepared by: Technical Compliance Consultants (NZ) Ltd

Date of SDS: 13 October 2021

Tel: 64 9 475 5240 www.techcomp.co.nz

Page 1

Specific target organ toxicity - repeated exposure Cat. 2	H373	May cause damage to organs (oral) through prolonged or repeated exposure.
Serious eye damage Cat. 1	H318	Causes serious eye damage.
Hazardous to the aquatic environment acute/chronic Cat. 1	H400/H410	Very toxic to aquatic life with long lasting effects.
Hazardous to terrestrial vertebrates	H431	Hazardous to terrestrial vertebrates
Hazardous to terrestrial invertebrates	H441	Hazardous to terrestrial invertebrates

<b>Prevention Code</b>	Prevention Statement
P102	Keep out of reach of children.
P103	Read label before use.
P201	Obtain special instructions before use.
P202	Do not handle until all safety precautions have been read and understood.
P260	Do not breathe dust/fumes/ vapours.
P262	Do not get in eyes, on skin, or on clothing.
P264	Wash hands and exposed skin thoroughly after handling.
P270	Do not eat, drink or smoke when using this product.
P272	Contaminated work clothing should not be allowed out of the workplace.
P273	Avoid release to the environment.
P280	Wear protective gloves, protective clothing and eye protection.
P281	Use personal protective equipment as required.

Response Code	Response Statement
P101	If medical advice is needed, have product container or label at hand.
P310	Immediately call a POISON CENTER or doctor/physician.
P330	Rinse mouth.
P363	Wash contaminated clothing before reuse.
P391	Collect spillage.
P301 + P310	IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.
P302 + P352	IF ON SKIN: Wash with plenty of soap and water.
P305 +	IF IN EYES: Rinse cautiously with water for several minutes. Remove
P351+P338	contact lenses, if present and easy to do. Continue rinsing.
P308 + P313	IF exposed or concerned: Get medical advice/ attention.
P333 + P313	If skin irritation or rash occurs: Get medical advice/attention.

Storage Code	Storage Statement
P405	Store in tightly closed original container and secure (locked up) in a cool
	dry place out of reach of children and pets and away from any food, drink
	and animal foodstuffs.

Disposal Code	Disposal Statement
P501	Dispose of according to Local Regulations or Authorities

# Section 3. Composition / Information on Hazardous Ingredients

Ingredients	Wt%	CAS NUMBER.
Potassium Cyanide	47.5	151-50-8
Other ingredients (including filler, encapsulating compounds, coating,	> 52.5	Proprietary
colourant)		

# Section 4. First Aid Measures

Product Name: Feratox
Prepared by: Technical Compliance Consultants (NZ) Ltd
Date of SDS: 13 October 2021
Prepared by: Technical Compliance Consultants (NZ) Ltd
Tel: 64 9 475 5240 www.techcomp.co.nz

If exposed or concerned or if medical advice is needed, have product container or label at hand. Consult the National Poisons Centre, 0800 764 766 [0800 POISON] or a doctor.

#### **Symptoms of Cyanide Poisoning:**

Dizziness, rapid breathing, headache, drowsiness, rapid pulse, unconsciousness, and convulsions.

#### Routes of Exposure:

If in Eyes Flood eye gently with clean fresh running water. Continue rinsing for at

least 15 minutes. Take care not to rinse contaminated water into a non-affected eye. Remove contact lenses, if present and easy to do after first 5

minutes then continue rinsing. Use antihistamine eye drops. Obtain

medical advice if irritation occurs.

If on Skin Remove any contaminated clothing. Wash affected area thoroughly with

running water for 20 minutes to ensure all product is removed. Launder decontaminated clothing immediately (and separate to household laundry)

before re-use or discard safely.

If Swallowed Obtain immediate medical attention if ingested.

Call 111 FOR AMBULANCE AND USE KEYWORDS 'Cyanide Poisoning'. Use emergency blanket to protect patient from heat loss. A doctor can

slowly administer 50 ml

25% sodium thiosulphate intravenously if indicated (patient unconscious

or incoherent, breathing irregular, possibly vomiting and/or with

convulsions).

If person is losing consciousness after ingestion, or is unconscious or

convulsing, then do NOT give anything by mouth.

Rinse mouth thoroughly with water. Do NOT give anything to drink. Do NOT induce vomiting. If vomiting occurs naturally, rinse mouth thoroughly

again with water.

If patient is conscious, breathing regularly and able to say what has

happened, keep under observation. Get medical assistance.

Do NOT use mouth to mouth or mouth to nose resuscitation, but instead use a suitable device or apparatus to give artificial respiration if breathing has stopped. Administer oxygen if breathing is shallow or irregular and

cardiopulmonary resuscitation (CPR) if heart has stopped.

If Inhaled If person has inhaled cyanide, and same hazard exists, then ensure

precautions taken to avoid exposure to yourself.

Refer to advice given for if swallowed.

Rinse mouth thoroughly with water. Do NOT give anything to drink. Do NOT induce vomiting. If vomiting occurs naturally, rinse mouth thoroughly

again with water.

If patient is conscious, breathing regularly and able to say what has

happened, keep under observation. Get medical assistance.

Do NOT use mouth to mouth or mouth to nose resuscitation, but instead use a suitable device or apparatus to give artificial respiration if breathing has stopped. Administer oxygen if breathing is shallow or irregular and

cardiopulmonary resuscitation (CPR) if heart has stopped.

#### Most important symptoms and effects, both acute and delayed

Symptoms: Refer to Section 11.
Swallowing: Fatal if swallowed.
Dermal: Fatal in contact with skin.

Skin: May cause an allergic skin reaction.

Eyes: Causes serious eye damage.

Chronic: Suspected of damaging fertility or the unborn child.

Causes damage to organs.

#### First Aid facilities

Eye and hand washing.

#### Advice to doctor

Product contains cyanide.

If indicated, slowly inject 50 ml 25% sodium thiosulphate intravenously and administer oxygen.

Section 5.	Fire Fighting Measures
Section 5.	rife righting measures

Hazard Type	Non-Flammable
Hazards from	Avoid breathing smoke. Combustion products include hydrogen cyanide,
products	carbon monoxide, carbon dioxide, nitrogen oxides and ammonia.
Suitable	Water spray, or alkali power only. Do NOT use acidic foam or powder or
Extinguishing	CO2 extinguishers.
media	
<b>Precautions for</b>	Wear self-contained breathing apparatus and personal protection
firefighters and	clothing (gas tight suit, helmet).
special protective	
clothing	
HAZCHEM CODE	2X

# Section 6. Accidental Release Measures

Wear protective gear as detailed in Section 8. Evacuate all unnecessary personnel.

Do not allow to enter drains and water courses. In event of major spill, inform Fire Service via 111 and then local Health Protection Officer at the Public Health Unit or hospital.

Contain spill. sweep up and transfer to suitable labeled container for re-use if suitable (unbroken, dry) or for disposal. Dispose of as hazardous waste to an approved waste management company in accordance with local regulations.

#### Section 7. Handling and Storage

# **Precautions for Handling:**

- Feratox® requires a Certified Handler/Controlled Substance License and records for tracking of product.
- Refer to Feratox® product label for use and application.
- During bait preparation, bait deployment, bait retrieval or opening sealed containers that hold Feratox®:
- Do not handle or consume food, drink or smoke. After handling and before meals, rest breaks, smoking and at the completion of work, remove protective clothing. Wash hands and any exposed skin thoroughly with soap and water, or wipes.
- Do not breathe dust/fumes/ vapours.
- Contaminated work clothing should not be allowed out of the workplace.
- Avoid release to the environment.
- Wear protective gloves, protective clothing and eye protection.
- Use personal protective equipment as required.

#### **Precautions for Storage:**

- Store in tightly closed original container and secure (locked up) in a cool dry place out of reach of children and pets and away from any food, drink and animal foodstuffs.
- Do not store with Class 1 (Explosives), 3 (Flammables), 5.1 (Oxidisers), 5.2 (Organic Peroxide Oxidizers), or 8 (Corrosive) products.

# Section 10. Stability and Reactivity

Stability of Substance	Stable under normal storage and use conditions.	
Possibility of hazardous	Not available	
reactions		
Conditions to Avoid	Keep dry. Avoid contact with moisture, water, acidic conditions	
Incompatible Materials	Acids, acid salts, strong oxidising compounds, carbon dioxide,	
	water, Sodium Nitrite, Zinc Phosphide	
<b>Hazardous Decomposition</b>	<b>on</b> Hydrogen cyanide, ammonia, potassium hydroxide.	
Products		

Section 11	Toxicological Information	

# **Acute Effects:**

Swallowed	Can be fatal if swallowed when pellets damaged/broken or cracked in the mouth. Pellets swallowed whole may pass through digestive system unbroken. Symptoms of poisoning include difficulty breathing (dyspnea), rapid breathing (tachypnea), nausea, dizziness, vomiting, headache, sweating and convulsions.
Dermal	Fatal in contact with skin.
Inhalation	Not an expected exposure route unless pellets is broken, or decomposing with risk of release of hydrogen cyanide gas. For symptoms of exposure, refer to Ingestion.
Еуе	Causes eye damage. If pellets broken and core exposed symptoms could include stinging, burning, extreme redness, tearing and dizziness. Flushing eye promptly with water is required to avoid ill-effects.
Skin	May cause mild irritation. Unbroken, dry pellets are safe to handle. Broken or decomposing pellets if contacting skin may sting especially if skin has cuts or abrasions. If the potassium cyanide pellet core contacts skin, then burns/ulceration might result so it is important to immediately wash any contaminated skin.

# **Chronic Effects:**

Carcinogenicity	Not applicable.	
Reproductive Toxicity	Suspected of damaging fertility or the unborn child.	
Germ Cell Mutagenicity	Not applicable.	
Aspiration	Not applicable.	
STOT/SE	Exposure by oral route can damage organs/systems; affects ability of cells to transfer oxygen.	
STOT/RE	Not applicable.	

# **Other Health Effects Information**

Product Name: Feratox
Date of SDS: 13 October 2021

Prepared by: Technical Compliance Consultants (NZ) Ltd
Tel: 64 9 475 5240 www.techcomp.co.nz

The potassium cyanide active ingredient is encapsulated in a hard inert coating so provide protection from incidental contact. Ill-effects require the pellet to be broken or decomposing. Exposure to moisture/water will cause decomposition. This is accelerated under acidic conditions.

# <u>Individual component information:</u> Acute Toxicity:

<b>Chemical Name</b>	Oral - LD50	Dermal - LD50	Inhalation - LC50
Potassium cyanide	5 mg/kg (rabbit)	13.3 - 33.3 mg/kg	0.015 mg/L/4hr
		(rabbit)	(rat)

## **Section 12. Ecotoxicological Information**

Very toxic to aquatic life with long lasting effects.

Hazardous to terrestrial vertebrates

Hazardous to terrestrial invertebrates

#### **Ecotoxicity**

Product is a Vertebrate Toxic Agent (VTA) so there is potential for harm to non-target terrestrial vertebrates. Avoid exposure to non-target species including domestic pets. If poisoning is suspected of domestic animals or livestock, consult a veterinarian immediately. Advice to Veterinarians Product is a Vertebrate Toxic Agent (VTA) so there is potential for harm to non-target terrestrial vertebrates. Avoid exposure to non-target species including domestic pets. If poisoning is suspected of domestic animals or livestock, consult a veterinarian immediately.

#### Active Ingredient is Potassium cyanide General

Symptoms are generalized and include frothing at the mouth, slobbering, increased respiratory rate, mouth breathing, rapid but weak heart rate, and muscle twitching. Mucous membranes are bright red, indicating the lack of oxygen transfer throughout the body that is necessary for survival at the cellular level. Death from respiratory paralysis occurs during severe convulsions. The heart continues to beat for several minutes after struggling ceases and breathing stops. Bright red blood often comes out of the nostrils and mouth.

#### **Treatment**

Administration of an IV solution of sodium thiosulfate, or sodium nitrite and sodium thiosulfate to "neutralise" the production of hydrocyanic acid may be appropriate. Note clinical signs of cyanide poisoning and nitrate poisoning are similar. Ensure nitrate poisoning is not cause first. Blood from nitrate poisoning will be chocolate brown compared to cherry red for cyanide poisoning.

#### Toxicity to aquatic organisms

The product has identified as being very toxic in the aquatic environment.

#### **Toxicity to terrestrial vertebrates**

The product has identified as being very toxic to terrestrial vertebrates. Product is registered as a Vertebrate Toxic Agent for possum and Dama wallaby control.

#### **Toxicity to terrestrial invertebrates**

The product has identified as being very toxic to terrestrial invertebrates.

#### Persistence/degradability

Pellets will breakdown within days of becoming wet. The potassium cyanide in the core of the pellet will react to liberate hydrogen cyanide gas which will dissipate into the atmosphere. Pellets will degrade more rapidly in contact with mist acidic conditions.

### **Mobility**

Pellets will breakdown within hours of becoming wet. The potassium cyanide in the core of the pellet is soluble in water.

#### **Environmental Exposure Standards**

EEL freshwater 18  $\mu$ g/L EEL marine 14  $\mu$ g/L

#### **Section 13. Disposal Considerations**

## **Disposal Method:**

Dispose of product (pellets) and waste as hazardous materials by burying with organic matter on active tip face of managed landfill, or bury with biologically active layer of soil in landfill, in accordance with Regional Authority or local Council bylaws. Ensure to dispose of empty containers safely to an approved landfill. Do not use empty containers for storing other products.

**Precautions or methods to avoid:** Avoid unintended release to the environment.

# Section 14 Transport Information

# This product is classified as a Dangerous Good for transport in NZ; NZS 5433:2012

#### Road, Rail, Sea and Air Transport

Restriction of Use
77A - The controls relating to
Vertebrate Toxic Agents, set out
in Schedule 3 of the Hazardous
Substances (Vertebrate Toxic
Agents) Transfer Notice 2004,
(Supplement to the New Zealand
Gazette, 29 October 2004, No.
141, page 3495, as amended by
New Zealand Gazette, 28 April
2005, no. 73, page 1739 and New
Zealand Gazette, 26 June 2006,
no. 68, page 1593) shall apply.

#### Variation:

The wording of the new controls given below may be different to that in the Hazardous Substances (Vertebrate Toxic Agents) Transfer Notice (New Zealand Gazette, Issue No. 141). This is because the controls in the transfer notice are written to apply to more than one substance at a time. For Feratox 475 g/kg, the wording has been simplified to apply solely to this substance. Nonetheless, this simplification has not changed the meaning or the requirements as set out in the Vertebrate Toxic Agents Transfer Notice.

Clause 2 Packaging of substances for sale for vertebrate pest control (1) No person may pack this substance for sale for vertebrate pest control unless the package is marked with a unique identifier. (2) The unique identifier marked on the container must comply with regulation 35 and regulation 36 of the Hazardous Substance (Identification) Regulations 2001. (3) For the purposes of regulation 35(3)(c) of those regulations, the unique identifier is a secondary identifier. (4) In this clause package means the smallest package in which the substance is sold.

Clause 3 Permissions required for application or use of certain substances (1) No person may apply or otherwise use this substance on land administered or managed by the Department of Conservation unless the person first obtains a permission from the Authority. (2) No person may apply or otherwise use this substance in a catchment area from which water is drawn for human consumption or in any other area where a risk to public health may be created if the substance is applied or used unless the person first obtains a permission from the Authority. Note: The Authority has delegated the giving of such a permission in the case of subclause (1) to the Department of Conservation (DOC), and, in the case of subclause (2) to the Ministry of Health. Persons wishing to apply this substance where a permission is required should contact the regional DOC office or the Ministry of Health.

Clause 7 Lost, spilt, or unintended application of substance If this substance is applied other than in the intended application area, or is lost or spilt, the person who is in possession of the substance at the time that it was misapplied, lost, or spilt must report the nature and quantity of the substance within 24 hours of the substance being misapplied, lost, or spilt to— (a) if a permission was granted in accordance with clause 3 (above) to apply or otherwise use the substance, the person who granted the permission; and (b) the officer in charge of the nearest police station to which the

	Health or the Medical Officer of Health in whose region the substance was misapplied, lost, or spilt; and (d) each owner or occupier of land on which the substance may
	have been misapplied, lost, or spilt; and (e) the person on whose behalf the substance is being applied.
Hazardous Property Controls No
