## FERACOL®

### Description

A highly palatable paste bait made with ferafeed 213. The active ingredient is Cholecalciferol (vitamin D3).

### Uses

Used for the control of possums. To be used in bait stations only in accordance with label instructions.

### Why use Feracol?

- Works efficiently by elevating calcium levels and causing heart failure.
- Biodegradable, no persistent residues, and little risk of secondary poisoning.
- Water resistant, remaining palatable for up to 2 months in the field.
- A high quality cost effective toxin that does not require a licence.
- A sound and trustworthy alternative to 1080 without secondary poisoning risk.
- Environmentally responsible, no secondary kills, minimal risk to native birds or non-target species.
- Safe to handle.
- Biodegradable, no persistent residues.

### Health and Safety

- By law this product must be used as specified on the product label.
- Wash your hands after use.
- Keep away from foodstuffs and store in original container.
- Keep out of reach of children.
- Keep away from domestic animals.
- Dispose of empty containers and unused bait in accordance with the label.
