CONSERVATION BY INNOVATION

FERATOX®

FAST ACTING
MOST HUMANE
NON POLLUTIVE

Description

Feratox® is a unique, encapsulated cyanide pellet used for possum control. The cyanide gas emissions from Feratox pellets are virtually undetectable as a result of the encapsulation process which over comes potential bait shyness. It offers a humane method of eliminating possums (unconscious within 2-5 minutes), but just as important, it enables control programmes to be measurable as you can see the results.

Uses

Used for the control of possums.

Why use Feratox®?

- Proven possum killer, see and measure the results.
- Environmentally responsible, no secondary kills, minimal risk to native birds or non-target species.
- The most humane possum bait.
- Safe to handle.
- New Zealand made, secure delivery systems.

Health and Safety

- Keep FERATOX under lock in a secure area.
- Ensure you have Amyl Nitrite on you at all times.
- Display all appropriate warning signs.
- Identify the risks associated with using FERATOX and manage them in a responsible manner.
- To be used by approved operators with a controlled substances licence only.
- By law this product must be used as specified on the product label.
- Dispose of empty containers and unused bait in accordance with the label.
